Sending a Secure Message to Home Bank

Anyone can send secure messages by going to Home Bank's web site and clicking the link, or by entering the URL in a browser.

<https://securemail2.home24bank.com/encrypt>

When an external user navigates to the URL, the user is prompted to enter his or her email address.

The first screenshot, titled "Initiate Secure Email", displays the Home Bank logo and a text prompt: "Please provide your email address to proceed." Below this is an "Email Address:" label followed by a text input field. A "Continue" button is located at the bottom right.

The second screenshot, titled "Login", also displays the Home Bank logo and features a graphic of a key. It prompts the user to "Log in to read your secure message." Below this are fields for "Email Address:" (with a pre-filled example) and "Password:" followed by a text input field. A "Forgot Password" link and a "Continue" button are at the bottom right.

If the user has already registered with Home Bank's Proofpoint Encryption, the user will be prompted to provide a password to authenticate before they can compose a secure message.

If the user has not already registered with Home Bank's Proofpoint Encryption, the user is prompted to create an account.

The user will then receive a confirmation to complete the registration process.

The screenshot shows a message box titled "Activation Request Sent". The text inside reads: "A verification message was sent to your email address which contains a URL you must use to activate your account. Once active, you will be able to send your secure message." Below this, it says: "If you do not receive this message within a few moments, please check your spam folder or other filtering tools you may be using as this activation message sometimes gets blocked."

Important: For security reasons, registering, authenticating, and composing secure messages with Proofpoint Encryption must be completed in the same browser, on the same system, within a 30-minute period.

The screenshot shows the "Registration" form with the Home Bank logo. It prompts the user to "Create your account to read secure email." The form includes fields for "Email Address:" (pre-filled with an example), "First Name:", "Last Name:", "Password:", and "Confirm Password:". Below these is a "Password Reset" section with a "Question:" dropdown menu (pre-filled with "Select a question.") and an "Answer:" text input field. A "Continue" button is at the bottom right.
